

STEEL SOCCER PROGRAM UPDATE – CORONAVIRUS (COVID-19)

April 1st, 2020

Steel Soccer is committed to the health and safety of our employees and the children and families that we impact every year. With the continued spread of the coronavirus (COVID-19), we are following all federal, state, and local guidelines to protect public health. We are continually monitoring the situation, and we are hopeful that the crisis created by the pandemic is temporary and passes quickly.

Currently, all Steel Soccer Spring programs, clubs, and tournaments remain closed to support social distancing, as mandated by the government. Based upon the latest guidelines from the federal government, we will remain closed through April 30, 2020. We are hopeful that April will be a pivotal month in the fight against coronavirus.

Steel Soccer operates in several states that have all been affected by COVID-19 in unique ways. We are currently studying the viability of adjusted formats and schedules within each state. Updates will be sent directly to families, coaches, and clubs enrolled in Steel Soccer programs. Each location may resume play on a different format/timeline.

All Summer camps nationwide remain open at this time. We understand that plans for soccer seasons are made far in advance, and we want to provide you with as much flexibility as possible to schedule the remainder of this season and next.

We are all disappointed that the players are not lined up, ready to play. We are monitoring the situation very carefully, and we are as anxious as you are to return to life as we know it (grass stains, sweaty socks, and goals).

We are truly confident the youth sports community will emerge from this situation more durable than ever. We remain committed to our mission to develop athletes and people on and off the field.

Thank you for your understanding during this unprecedented time in our nation's history.

Sincerely,

Steel Soccer Management
